No. PCMM/ADMN/Policy/P&S/2022

Dt. 19/04/22

Sub: Consideration of dues against developmental orders while working NPQ for subsequent tender

Views of PCMM is hereby circulated on the subject:

There can not be a common policy applicable to every case in such matters. Depending on the progress of the development of the product and various stages already completed by the developmental source e.g. design documents of prototype, inspection of prototype, progress of field trials, other items being supplied by the firm, past quantity supplied or not; TC has to take a judicious call in such cases. Many items being very high value and the production programme being dynamic; having a static policy in the subject matter is not desirable.

This is issued for intimation of all concerned purchase officers.
